MEMORANDUM FOR THE RECORD

SUBJECT: Project CHALICE

25X1A9a

One of the contractors has requested permission to file for patents on two inventions, in both the United States and Canada. [REDACTED] and the technical and security people involved have no objections. In approving the proposal, I advised Dan that he should remind the contractor to issue us a confirmatory license at the proper time. When they are ready to do so, we will furnish Dan with proper forms whereby the license will be issued in the name of another Government department.
